

## Lift Options

1. Our top of the line lift is our **Ultra 2 Series**. Its features include:

- Precision-Designed & Custom-molded High-impact Polyethylene Tanks
- All Steel Above The Water Line (Standard Installations)
- Full-width 4" Frame Channel with 3" Adjustable Expansion Channel
- Heavy-duty 1/4" Torsion Bars
- Boat-Side Padded Step Pitmans
- Five-inch high-density polypropylene square hole bushings
- Heavy-duty Hull Support System
- Grade-8 pivot hardware
- Heavy-duty construction
- Heavy-duty structural-grade dock brackets with molded bumper guards
- Two-piece stainless/polyethylene pitman bushings
- Shallow Water Models also available

2. The **E-Series Lift** is the newest lift available. It is a wonderful lift for a customer wanting a great product at a lower cost. The E-Series lift is 6,500 lb lift that has some, but not all, of the same features found in our Ultra Series. The features include:

- Custom molded polyethylene tank
- Heavy-duty galvanized construction
- Lockable deck-mounted control box
- Ultra Grip™
- High-density polyethylene square-hole bushings

3. A **Refurbished HydroHoist Lift** is yet another option available for getting your boat out of the water. It is a lift built with all new components except the tanks. The tanks have been washed, checked for leaks, and painted with the best paint available for this application. The lift will be built with brand new components which means the first major maintenance should be around 17-19 years after installation. Refurbished lifts are subject to availability.
